Professional Summary

Information Systems student at Assiut University with a strong interest in Full Stack Development, Backend Development, and Artificial Intelligence. Experienced in developing web applications using ASP.NET MVC, ASP.NET Core, C#, SQL Server, and Entity Framework Core. Familiar with designing database-driven applications, implementing authentication and authorization, and building RESTful web solutions. Strong problem-solving and analytical skills with experience collaborating on software development projects using Git and GitHub. Seeking an Internship or Junior Full Stack Developer opportunity to contribute to modern software solutions while expanding technical expertise.

Technical Skills

Programming Languages: C#, C++, Python, Java, SQL

Web Development: ASP.NET MVC, ASP.NET Core, HTML5, CSS3, PHP, Bootstrap

Backend: Entity Framework Core, ASP.NET Identity, REST APIs

Database: SQL Server

Tools: Visual Studio, Visual Studio Code, Git, GitHub

Concepts: Object-Oriented Programming (OOP), MVC Architecture, CRUD Operations, Authentication & Authorization, Database Design, Software Development Life Cycle (SDLC)

Projects

Mobile Store Management System

GitHub: github.com/ahmedkamal-31/mobile-store

- Developed a web-based Mobile Store Management System using ASP.NET MVC, C#, SQL Server, and Entity Framework Core.
- Implemented complete CRUD operations for managing application data through a structured MVC architecture.
- Integrated ASP.NET Identity to provide secure user authentication and role-based authorization.
- Designed and managed relational database models using Entity Framework Core and SQL Server.
- Collaborated with project development using Git and GitHub for version control and source code management.
- Applied software engineering principles and object-oriented programming practices throughout the development process.

Sanna – Service Marketplace

GitHub: github.com/ahmedkamal-31/Sanna-project

- Contributed to the backend development of a service marketplace connecting customers with nearby service providers.
- Participated in requirements analysis and application planning to support project development.
- Assisted in designing the database structure for customer accounts, service providers, ratings, and reviews.
- Supported the implementation of backend features for managing customer information and marketplace functionality.
- Worked collaboratively with team members throughout the software development lifecycle using Git and GitHub.

Education

Bachelor of Computers and Information

Information Systems

Faculty of Computers and Information

Assiut University

Expected Graduation: 2027

Certification

HackerRank SQL (Basic)

<https://www.hackerrank.com/certificates/d50e214e1759>

Languages

Arabic: Native

English: Professional Working Proficiency

Interests

Full Stack Development • Backend Development • Artificial Intelligence • Problem Solving • Continuous Learning
