Ahmed Kamal Mohamed

Junior .NET Developer | Full Stack Developer

Sohag, Egypt | +20 1146291310 | ahmedkamal312005@gmail.com
Portfolio | LinkedIn | GitHub

Professional Summary

Student at the Faculty of Computers and Information, Assiut University, with hands-on experience developing web applications using C#, ASP.NET Core MVC, Entity Framework Core, SQL Server, and ASP.NET Core Identity. Experienced in building database-driven applications, implementing authentication and authorization, and developing e-commerce platforms. Recently expanded into REST API development and third-party API integration through DevScope, a full-stack GitHub analytics platform. Seeking an Internship or Junior .NET Developer opportunity to apply technical skills, contribute to real-world projects, and continue growing as a software developer.

Technical Skills

Programming Languages: C#, C++, Python, Java, SQL
Web Development: ASP.NET MVC, ASP.NET Core, HTML5, CSS3, PHP, Bootstrap
Backend: Entity Framework Core, ASP.NET Identity, REST APIs
Database: SQL Server, MySQL
Tools: Visual Studio, Visual Studio Code, Git, GitHub
Concepts: Object-Oriented Programming (OOP), MVC Architecture, CRUD Operations, Authentication & Authorization, Database Design, Software Development Life Cycle (SDLC)

Projects

FurniCraft – Furniture E-Commerce Web Application | GitHub Link | Live Demo

- Developed a furniture e-commerce web application using ASP.NET MVC, C#, Entity Framework Core, SQL Server, ASP.NET Identity, HTML5, CSS3, and Bootstrap.
- Implemented product catalog and product details functionality with furniture customization options and selectable product configurations.
- Built shopping cart, checkout, and order management functionality for handling customer purchases and order workflows.
- Integrated ASP.NET Identity for secure user authentication and authorization, with administrative functionality for managing products and orders.
- Designed and managed relational database models using Entity Framework Core and SQL Server.

Luxury Car Rental – Car Rental Web Application | GitHub Link | Live Demo

- Developed a luxury car rental web application using ASP.NET Core MVC, C#, Entity Framework Core, SQL Server, and ASP.NET Identity.
- Implemented car listing and details functionality to allow users to browse available luxury vehicles and view their information.
- Built a rental booking system for managing customer reservations and rental workflows.
- Integrated user authentication and authorization with an administrative dashboard for managing cars, brands, and categories.
- Designed and managed application data using Entity Framework Core and SQL Server.

DevScope – GitHub Developer Analytics Platform | GitHub Link | Live Demo

- Developed a full-stack developer analytics platform using ASP.NET Core Web API, C#, React, and TypeScript.

- Integrated GitHub OAuth 2.0 authentication and GitHub API data to display developer profile and repository statistics.
- Built a repository explorer with search, filtering, sorting, and pagination.
- Implemented interactive language analytics to visualize programming language usage and repository insights.

Mobile Store Management System | GitHub Link | Live Demo

- Collaborated on developing a web-based Mobile Store Management System using ASP.NET MVC, C#, SQL Server, and Entity Framework Core.
- Contributed to implementing CRUD operations for managing application data through a structured MVC architecture.
- Participated in integrating ASP.NET Identity to provide secure user authentication and role-based authorization.
- Assisted in designing and managing relational database models using Entity Framework Core and SQL Server.
- Collaborated with team members using Git and GitHub for version control and source code management.

Sanna – Service Marketplace | GitHub Link

- Contributed to the backend development of a service marketplace connecting customers with nearby service providers.
- Participated in requirements analysis, system planning, and application development to support customer and service provider workflows.
- Assisted in designing the database structure for customer accounts, service providers, service requests, ratings, and reviews.
- Supported backend functionality for managing customer information, service requests, and marketplace features.
- Worked collaboratively with team members throughout the software development lifecycle using Git and GitHub.

Education

Bachelor of Computers and Information Expected Graduation: 2027
Information Systems | Faculty of Computers and Information
Assiut University

Certification

HackerRank SQL | View Certificate
Mahara-Tech Certificates | View Certificates

Languages

Arabic: Native | **English:** Very Good

Interests

Full Stack Development • Backend Development • Artificial Intelligence • Problem Solving • Continuous Learning
